

**Masina Hospital**

Your Health. Our Mission.

Advanced Cardiac Care  
A Unit of Masina Hospital

September 26, 2020

To Whom It May Concern

This is to state that Miss. Aisha Bangi, 20 year old female has been examined by me. She is diagnosed to have Pulmonary embolism and advised to undergo Pulmonary endarterectomy surgery by me at the earliest.

The total cost of operation in our hospital works out to around Rs.20,00,000/- (Twenty lakhs only) in general class. Please note the charges mentioned are indicated only. Actual expenses may be more or less depending on patient's condition. Patient will have to undergo certain preoperative investigations which would cost about Rs.7500/- and blood has to be replaced before surgery, which can be of any blood group.

Patient is financially weak and needs some financial help to bear the expenses of the surgery. She needs to arrange this sum at the earliest. Cheques may please be issued in the name of "Good Health Concept LLP".

Kindly do the needful.

Thanking you.
